Civil Project Engineer. (Full Time) Dundalk, - Construction

Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

Job Description

You will work as part of our multi-disciplinary engineering team to bring water and wastewater projects from initial design, through to completion and handover to the client. You will have the opportunity to work alongside , and collaborate with, industry-leading project teams, working in a one-team culture while broadening your own skillset.

As a Civil Project Engineer you will be expected to support the project manager and contracts manager in the daily operation and delivery of projects as well as showing progression and development in your own career. Due to the nature of the works completed by Glanua you will have an opportunity to witness a wide variety of multi-disciplinary engineering activities and will have the opportunity to focus and develop, a specialised knowledge base and progress your career, with a wide variety of career paths available.

Glanua is a progressive company that always seeks to develop its employees. When you demonstrate aptitude and interest in furthering your career within the organisation, training and promotion will always be available to you.

Main Duties and Responsibilities:

The main duties and responsibilities of the Civil Project Engineer are outlined as follows:

Work as part of a team in the delivery of one or more projects at any one time, embracing the ethos of a "one team" culture.

Ensure Health, Safety, Environmental & Sustainability standards, policies and procedures are always adhered to on-site.

Be familiar with the HSQE management system and procedures in conjunction with the current statutory requirements

Be available and willing to provide coverage should the project manager be absent for any reason, assuming the role of managing the day-to-day operation of the site

Need to be familiar with programme and budgets for the project, fully understanding the impact any overruns shall have on the project

Review and develop specifications and design drawings, have the ability to develop solutions to design based issues.

Use of GPS, total station and 3D scanner for setting out and collection of As Built information

Completion of technical reports and quality documentation, input to safety files and O&M and completion of monthly progress reports

Ensuring design, materials and workmanship is in line with the specified requirements

Utilising procurement software to ensure materials and subcontracts are ordered/ awarded as and when required

Liaise with relevant consultants, subcontractors, site staff, commercial resources and the general site team involved in the project

Completion of weekly whiteboard meetings on site, planning the efficient and safe delivery of works

Day to day interaction with the employer's representatives, stakeholders and members of the public

Keep apprised of the latest standards and technology through continuous professional development (CPD).

Show an eagerness to learn and progress in your own career as well as the mentoring and training of more junior staff..
