## Architect

### Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

### Job Description

ARCHITECT

About Us:

We are a leading private property development company based in Dundrum, Dublin. This position will be based in office at Dundrum. We specialize in creating high-quality, tourism accommodation, residential, and commercial developments that enhance communities. We have several exciting projects, where we require a creative and ambitious architect interested in raising the standard of design generally produced in Ireland.

We are seeking a RIAI registered architect, with 5 – 10 years' experience, who will be responsible for conceptualising and designing outstanding tourist and accommodation-related projects. Knowledge of current statutory compliance procedures in Ireland and seeing projects progress through BCAR to completion is essential.

Key Responsibilities:

Prepare and submit planning applications and support the navigation of the planning and approval processes, ensuring all designs are compliant.

Coordinate with internal teams, external consultants, and contractors to ensure seamless project delivery.

Produce detailed technical drawings and 3D models using BIM software (Revit, AutoCAD, or similar) for construction and for Fire Safety Certificates and Disabled Access Certificates, ensuring accuracy and effective integration across disciplines.

Liaise with clients, local authorities, contractors, and other key stakeholders, ensuring their

requirements are understood and incorporated into the design.

Conduct site visits to monitor construction progress, address design-related queries, and ensure the design intent is being adhered to, providing technical support.

Incorporate sustainable design practices and innovative solutions into the project delivery, including energy-efficient design, sustainable materials, and green building standards.

Collaborate with team members, sharing knowledge and expertise.

Skills & Experience Required:

A recognized degree in Architecture, with professional RIAI accreditation.

A minimum of 5-10 years of experience as an architect, with a proven track record in residential and mixed-use developments from concept through to construction. Experience in a private property development environment is highly advantageous.

Strong knowledge of AutoCAD, Revit, and other architectural design software (e.g., SketchUp, Adobe Suite). Familiarity with BIM is essential, and experience in managing digital workflows is a plus.

Solid experience in taking projects from design concept to completion, including involvement in planning applications, BCAR(AC/DC), Fire and Access certificate applications, technical documentation, Health and Safety documentation including design risk assessments and PSDP role, and on-site support.

In-depth understanding of Irish building regulations, BCAR, planning processes, planning exemptions, and construction codes, especially as they apply to residential developments.

Excellent verbal and written communication skills.
