Construction - Site Foreperson/Supervisor

Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

Job Description

Due to an expanding folio/ portfolio of works Glanua is seeking an experienced Site Foreman / Supervisor. You will work as part of the management of our multi-disciplinary project delivery team from initial mobilisation to site to final site finishes and demobilisation. You will have the opportunity to experience the full variety of works involved in the delivery of Irish Water projects, from pipelaying and deep drainage works to site finishes such as landscaping and kerbing.

You will work closely with the contracts managers, site project manager and engineers in the delivery of our pipeline of works, managing site teams and subcontractors and you will be a key link between design and site delivery.

You will work in a one-team culture while actively contributing to your own skills and experience. Your role will be primarily involved in Process Design however due to the nature of the multi-disciplinary work completed by Glanua you will also be exposed to other engineering disciplines in Mechanical, Electrical, Instrumentation, Control and Automation (MEICA) as well as civil engineering and building. This will present a wide multi-disciplinary engineering knowledge base and an opportunity to progress your career. The main duties and responsibilities of the Site Foreman / Supervisor are outlined as follows:

Work as part of a team in the delivery of one or more projects at any one time, embracing the ethos of a "one team" culture.

Ensure Health, Safety, Environmental & Sustainability standards, policies and procedures are always adhered to on-site.

Be familiar with the HSQE managements system and procedures in conjunction with the current statutory requirements.

Be available and willing to provide coverage should the project manager be absent for any reason, assuming the role of managing the day-to-day operation of the site.

Need to be familiar with programme and budgets for the project, fully understanding the impact any

overruns will have on the project.

Have an input in the development of RAMS, completion of safety paperwork including statutory and company safety inspections.

Understand the requirements in relation to the project design, specifications and client requirements.

Drive and maintain standards for all site personnel, both direct staff and subcontractors.

Ensure all works are completed to a high standard, efficiently and avoid reworks and identify and rectify any defects in a timely manner.

Participate in site safety inspections, performed by both internal and external parties. Provide input in the closing out of any items identified.

Ensure a positive experience for the client and their representatives instilling an ethos of collaboration, co-operation and respect.

Other duties as required from time to time.
