Electrical - Apprenticeship

Job Description

First Year Apprentice Vacancy

First year Apprenticeship Available in Galway. Please apply on:

<https://api.occupop.com/shared/job/1st-year-electrical-apprenticeship-286b7/>

Role Purpose

An Apprentice electrician job description entails working under a qualified electrician so as to be taught the trade via first-hand experience and via structured class-based study through SOLAS.

The electrical apprentice is concerned with the installation, commissioning, testing and maintenance of: electrical wiring systems and services; electrical plant and control equipment; process monitoring and control systems. Modern process plant includes electrical, electro-mechanical, electropneumatic-, electronic- and microprocessor-based systems. In order to function effectively and efficiently, the electrical craftsperson must have a broad base of technical knowledge complementary to information gathering and analytical skills.

The ability to interpret technical data and the proper use of test instruments is critical for effective system maintenance, fault diagnosis and rectification, and the installation/calibration of sensors, transmitting and controlling devices. This craftsperson must maintain effective communications with colleagues, clients and equipment suppliers. Proper maintenance, and updating of job related and equipment-related documentation is critical. All work undertaken by electrical apprentice is subject to statutory regulations governing the safety of personnel, plant, premises and the environment.
