Job Description

Energywise Ireland is a leading company in the renewable energy sector focused on sustainable solutions and innovative technologies. Our mission is to improve energy efficiency and reduce carbon footprints across various industries.

With our offices based in Cork, Kerry and Clare we are at the forefront of Solar PV solutions across Munster. As we stride into a phase of remarkable growth driven by the country's commitment to combat climate change, we are seeking dynamic individuals to join our company.

Due to our continued expansion at Energywise Ireland Limited, we are currently in search of a skilled Electrician and HVAC Technician to join our team located in Cork.

Responsibilities:

Wire and install heat pumps, an array of PV inverters, hybrid inverters, diverters, and EV chargers in domestic, commercial buildings and agricultural facilities.

Electrical safety, meticulously inspecting systems for damage, malfunctions, and potential hazards.

Engage directly with our clients, providing expert insights and guidance throughout the project lifecycle.

Execute tasks with precision and meet project timelines.

Keep records up to date and compile essential documentation and photographs for seamless project documentation.

Install, commission, and service air-source and ground-source heat pump systems in residential and commercial settings.

Diagnose faults and perform maintenance and repairs on existing heat pump systems.

Carry out system testing and performance checks, including refrigerant pressure and electrical diagnostics.

Maintain accurate records of work completed, materials used, and issues encountered.

Provide professional advice and technical support to customers and team members.

Requirements:

A qualified Electrician

F-gas registration or a course as a HVACT Technician

Over 3 years of hands-on experience as an electrician in either domestic or commercial settings.

Working on roofs, your comfort at heights is commendable.

Knowledge of heating systems desirable

Must be a good team player, a good

Familiarity with Solar PV is a major advantage, showcasing your adaptability.

Your commitment to health and safety is unwavering, and your attention to detail is unparalleled.

Hold a full clean driver's license, enabling you to move efficiently between project sites.

Time management and organizational skills.

What we offer:

A competitive salary package.

Provision of a company van, fuel card, and mobile phone.

Participation in our pension scheme.

Healthcare cover with Laya Healthcare.

Employee Assistance Programme.

20 days annual leave + 2 company days.

Additional annual leave for years of service.

An excellent work-life balance.

Opportunities for professional development and career advancement.

The chance to be part of a company at the forefront of sustainable energy solutions.

A supportive and collaborative work environment.
