## Construction - Project Manager - Operations and Maintenance - Water and Wastewater Treatment Experience

### Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

### Job Description

Location Base: Ballincollig Regional Office covering our Projects throughout Southwest of Ireland

The main duties and responsibilities of the Project Manager-Operations and Maintenance are outlined as follows:

Work as part of a team in the delivery of one or more projects at any one time, embracing the ethos of a "one team" culture.

Ensure Health, Safety, Environmental & Sustainability standards, policies and procedures are always adhered to on-site.

Work closely and collaborate with all key stakeholders including clients, client representatives

Ensure a positive experience for the client and their representatives instilling an ethos of collaboration and cooperation.

Lead the O&M team in all aspects of wastewater treatment plant interim operation and maintenance.

Conduct regular Health and Safety inspections on O&M sites as well as conducting and leading safety briefings and training sessions.

Monitor project performance including risk and opportunities. Mitigate/reduce risk where possible and manage opportunities.

Lead the team in the procurement of supplies and sub-contracts on time and within budget.

Monitor, review and submit monthly status reports (MSRs) to the client and attend progress meetings where required.

Build and promote industry-leading teams by providing training and mentoring of staff including setting out development plans for your team.

Develop and implement preventative maintenance schedules ensuring all assets are kept in good working order and available for use.

Implement reactive maintenance visits and deployment as required when issues arise.

Support project delivery teams in the process commissioning phase and coordinate the transition

from the design & build phase into the operation & maintenance phase.

Develop and maintain Standard Operating Plant Procedures (SOPPs) where required.

Schedule and rota staff for each facility under your remit. Adjust and react to any annual leave or sick leave ensuring plants are covered at all times.

Maintenance of the contract SharePoint O&M Site, Microsoft Teams & Glanua shared drive folders where applicable.

Provide assistance, oversight and guidance from time to time on tendering opportunities for new upcoming projects.

Respond to and address any client and stakeholder complaints in a timely manner. Obtain client satisfaction surveys and provide any feedback on how to improve our client satisfaction.

Seek to improve the operation and maintenance process by providing lessons learned feedback and innovative solutions for adoption on current and future projects.

Keep apprised of the latest standards and technology through continuous professional development (CPD).

Other duties as required from time to time.

Knowledge, Skills and Experience:

The main knowledge, skills and experience required of the Project Manager-Operations and Maintenance are outlined as follows:

Minimum of 5 years' experience working in a similar role, preferably in the water and wastewater industry.
