## Timber Machinist

### Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

### Job Description

Job Description:

- Machinery Operation & Maintenance - Set up, operate, and maintain a wide range of workshop machinery including:
  - Busellato CNC machine using Genesis Evolution WOP software
  - Surface planer
  - Spindle moulder
  - Modern table saw
  - Belt sander
  - Re-saw
  - 5-sided planer/moulder
- Ensure machinery is kept in top operational condition with regular maintenance and troubleshooting.
- Programming & CNC Operations
  - Confidently program, operate, and maintain the Busellato CNC machine.
  - Interpret technical drawings and input specifications accurately into the CNC software.
- Team Leadership
  - Lead and supervise workshop staff, ensuring safe and efficient workflows.
  - Train apprentices and new staff on machinery use, safety procedures, and production standards.
  - Act as a mentor and uphold a strong team culture within the workshop.
- Quality Control & Production Oversight
  - Monitor the quality of outputs to ensure products meet high craftsmanship standards.
  - Collaborate with designers and project managers to optimize processes and resolve production issues.

Qualifications:

Minimum of 10 years' experience as a timber machinist or similar role.

- Extensive experience with setting up, operating, and maintaining woodworking machinery as listed above.
- Proficient in CNC programming, specifically with Busellato machines and Genesis Evolution WOP software.
- Strong understanding of workplace health and safety regulations.
- High attention to detail, excellent problem-solving skills, and a commitment to quality craftsmanship.
- Production Planning: Develop and execute production schedules, considering materials, labour, and machinery availability.
- Quality Control: Implement and oversee quality assurance processes to ensure timber products meet industry standards and customer expectations.
- Resource Allocation: Allocate human and machine resources effectively to meet production targets while optimizing costs
- Inventory Management: Maintain adequate stock levels of raw materials and finished products, minimizing wastage and stockouts.
- Safety Compliance: Ensure a safe working environment by enforcing safety regulations and providing necessary training to staff.
- Staff Supervision: Lead, motivate, and manage production teams, including carpenters, machine operators, and quality control inspectors.
- Process Improvement: Continuously identify and implement process improvements to enhance productivity and reduce production times.
- Problem Solving: Address production issues promptly, troubleshoot equipment malfunctions, and find solutions to maintain production continuity.
- Environmental Sustainability: Promote eco-friendly practices, including waste management, to reduce the environmental footprint
