### Job Description

Harrington Civil Engineering have an exciting opportunity to join our growing company, and we are now hiring for a Site Engineer to join our team. This is a six month Fixed Term contract of employment for an immediate start.

#### Key objective:

Site Engineer required for civil engineering construction contracts. Ideally, the candidate should have minimum 2-5 years relevant experience on Civils/Drainage/Roads/Earthworks projects. The candidate should have experience in setting out, using GPS Systems, Total Stations, and be proficient with the use of AutoCAD software.

#### Principal Duties

Ensure Compliance with current Irish Health & Safety Regulations and with company health & safety policy on site.

Oversee quality control onsite for all aspects of the works

Assist in the supervision and monitoring all aspects of the works on site on a daily basis.

Setting out all elements of works

Maintaining daily site records and testing records.

Assist in the updating the works programme.

Supervising sub-contractors works on site.

Liaising with clients and their representatives, including attending regular progress update meetings

Effectively and efficiently organising site facilities in order to meet agreed deadlines

Resolving any unexpected technical difficulties and other problems that may arise.

#### Skills/Experience

Relevant experience in pipeline, earthworks and roads

Have at least 2 years post graduate relevant experience on site.

Proven track record as a Setting Out Engineer on road engineering projects within the last 12 months.

Proficient in use of setting out equipment – GPS, Total Station, Dumpy levels

Experience working with AutoCAD

Able to communicate and be fluent in English (Written and Spoken)

Must be able to work on own initiative and part of a team.

Excellent Technical & analytical skills, good problem solver

Knowledge:

Minimum NFQ Level 8 Degree in Civil Engineering

Have a good knowledge of and awareness of current Health and Safety Regulations

Certification in Traffic Management and Underground services would be an advantage

Proficient in Microsoft packages
