## Web Design and Development Professional

### Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

### Job Description

Are you passionate about building attractive, functional websites and online experiences? Do you have a strong eye for design and a love for clean, effective code? We are currently seeking a skilled and creative Web Design and Development Professional to join our growing team.

This is a great opportunity to bring your technical knowledge and creativity together in a dynamic and supportive environment. Whether you're updating existing websites or building new digital experiences from the ground up, your work will make a real impact.

### Position Overview

As a Web Design and Development Professional, you will be responsible for designing, coding, and improving our websites and digital platforms. You'll work closely with other developers, designers, and content creators to deliver high-quality web solutions that meet client needs and enhance user experiences.

### Key Responsibilities

Design, develop, and maintain modern, responsive websites and web applications

Write clean, well-documented code using HTML, CSS, JavaScript, and other web technologies

Optimize websites for speed, performance, and SEO best practices

Ensure compatibility across browsers, operating systems, and devices

Troubleshoot and resolve website issues and bugs quickly

Collaborate with team members to plan and implement website layouts and features

Update website content and manage integrations with third-party tools

Maintain website security and conduct regular backups

---

#### What We're Looking For:

Completion of a post-secondary program, certificate, or training course in web development, design, or a related field (or equivalent experience). However, graduated from college or university are preferred.

Basic understanding of web technologies such as HTML, CSS, and JavaScript

Interest in learning responsive web design and mobile-friendly development

Willingness to learn and use popular content management systems (like WordPress)

Some familiarity with design tools (like Canva, Figma, or Photoshop) is an asset

A good eye for layout, design, and user experience (UI/UX)

Ability to follow instructions, ask questions, and work well with others

Good communication skills and a positive attitude

A personal portfolio, school project, or example of previous web work is a bonus—but not required

---

#### Why Work With Us?

Flexible, creative, and collaborative work environment

Opportunities for professional growth and skill development

Work on a variety of exciting web and digital projects

Competitive pay and supportive team culture

- **Sector:** information and communication

#### Career Level

- Entry Level
