Job Description

Galway Tool and Mould Ltd is seeking a skilled Senior Injection Moulding Process Engineer to join our dynamic team.

This is a permanent, full-time opportunity based in Galway City.

Salary is negotiable based on relevant experience.

Key Responsibilities

Process Development & Optimization

Design and implement injection moulding processes for new moulds

Conduct trials and scientific moulding studies to ensure process robustness

Troubleshoot moulding issues and provide solutions to improve product quality

Collaborate with customers and material suppliers

Develop and maintain process documentation, including SOPs and troubleshooting guides

Ensure compliance with safety, environmental, and quality standards

Work with design, manufacturing, and quality teams to optimize part designs for manufacturability

Provide technical training and mentorship to technicians and operators

Qualifications

Bachelor's degree in mechanical, Plastics, or similar relevant experience/qualification

3–5 years of experience in injection moulding operations

Strong understanding of moulding machines, tooling, and materials

Experience with scientific moulding principles and process simulation tools

- **Sector:** manufacturing
