Construction - Mechanical Site Fitter (Navan)

Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

Job Description

You will work as part of our multi-disciplinary engineering team to bring water and wastewater projects from initial design, through to completion and handover to the client. You will have the opportunity to work alongside, and collaborate with, industry-leading project teams, working in a one-team culture while broadening your own skill set.

As a Site Mechanical Fitter, you will be expected to support the project manager and contracts manager in the daily operation and delivery of projects as well as showing progression and development in your own career. You will primarily be involved in Mechanical, Electrical, Instrumentation, Control and Automation (MEICA) installation and repair work however due to the nature of the works completed by Glanua you will also have an opportunity to witness civil/building engineering works as well as commissioning and operations. This will present a wide multi-disciplinary engineering knowledge base and an opportunity to progress your career.

Glanua is a progressive company that always seeks to develop its employees. When you demonstrate aptitude and interest in furthering your career within the organisation, training and promotion will always be available to you.

Main Duties and Responsibilities:

The main duties and responsibilities of the Mechanical Site Fitter are outlined as follows:

Work as part of a team in the delivery of one or more projects at any one time, embracing the ethos of a "one team" culture.

Ensure Health, Safety and Environmental standards, policies and procedures are always adhered to.

Review of design stage mechanical drawings and P&ID in order to validate designs, familiarise with project and spot issues before they arise.

Site install of mechanical systems, pipework and equipment including supporting brackets and

stands. Pipework and valve installations may range from DN4mm to DN2000mm in PVC, DI, PE or SS.

Modification, fabrication and installation of mechanical systems.

Complete system testing in the form of pipework pressure tests and completion of inspection test records (ITRs) on completion of installation.

Maintenance and repair of existing water / wastewater treatment equipment including strip-down, part replacement and re-building.

Troubleshoot equipment and instrumentation, strip-down and repair equipment as necessary to ensure good working order.

Conduct periodic inspections and preventative maintenance on system installations.

Organise and facilitate plant shutdowns and/or diversion of flows as required with project delivery team and the customer through permit-to-work systems.

Ensuring all works are to the company and mechanical standards.

Complete Health & Safety checks and permits as required for work activities being undertaken.

Ensure a positive experience for the customer and their representatives instilling an ethos of professionalism, collaboration and co-operation.
