Job Description

Job Title: Web Applications Developer (PowerApps)

Location: This post will primarily be located in one of the core Client Offices e.g. Ballina, Co. Mayo, Loughrea, Co. Galway, Bowe Street, Dublin or other such places designated as convenient with remote possibilities.

Contract / Permanent: 12 Months with further extension.

Start date: Asap September 2025.

Role:

To support the client's strategic proposition of "Innovation in everything we do", the client Technology Platforms and Solutions (TPS) Team provide services that are enablers and a strategic partner to the business in supporting their technology needs.

The client TPS Technical Solution Delivery Team are responsible for the development and ongoing maintenance and support of a number of business-critical systems that are used to provide services to both internal and external customers.

A requirement now exists for a PowerApps developer on a contract basis, a candidate that is knowledgeable and experienced about all things related to technology solutions and ensuring that these solutions deliver fully on business requirements.

A professional who will go above and beyond the call of duty to support the client's technological needs.

Experience Level Required:

It is a mandatory requirement that the Resource proposed has the equivalent of 4-6 Years' professional experience (Intermediate).

It is a mandatory requirement that the Resource proposed hold the following qualifications or

equivalents:

At a minimum, hold Level 8 on the National Framework of Qualifications) with computing/computational modules taken in the final year combined with 4-6 years directly relevant, hands-on experience.

Mandatory : Full driver's license required.

Key Deliverable:

The following non-exhaustive list of Key Deliverables are applicable to this Role.

Assisting the Development team when appropriate in the following areas:

Initiate, Planning and Design stages for PMO projects.

Technical Design of PowerApps and RPA solutions.

Evaluations for PMO project.

Provide estimations to feed into PMO project plans.

Design, develop, and implement custom business applications using Microsoft PowerApps (Canvas and Model-driven) or alternative technologies where appropriate.

Integrate PowerApps with external data sources such as Dataverse, SharePoint, SQL Server, and other Microsoft and third-party applications.

Develop and maintain PowerApps components, custom connectors, and UI enhancements.

Build automation workflows using Power Automate, Power Automate Desktop or suitable alternative solutions.

Collaborate with business users, analysts, and IT teams to understand requirements and translate them into technical solutions.

Ensure application security, governance, and compliance best practices are followed.
