In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

Job Description

Engineering Manager – Pottery Road, Dun Laoghaire

Elis Ireland delivers a complete textile rental and laundry service to organisations across a wide range of industries. From workwear and chef wear to cloths, entrance mats, mops, bed and bath linen, and hygiene equipment for public facilities, we provide essential solutions to thousands of businesses throughout Europe. Our four business lines – Hospitality, Healthcare, Workwear, and Facility – support the organisations that make daily life possible.

Benefits of working with Elis: Competitive salary, opportunities for professional development, a supportive and collaborative work environment, and the chance to work with cutting-edge equipment in a dynamic industry.

We are currently seeking an Engineering Manager to join our team. This role will manage the full maintenance and plant engineering function at our Pottery Road site in Dun Laoghaire.

Key Responsibilities

- Manage the day-to-day maintenance and engineering operations within a high-volume production facility.
- Ensure high levels of equipment availability and minimise downtime.
- Maintain and update all maintenance procedures.
- Diagnose and resolve equipment faults and errors efficiently.
- Oversee and ensure timely completion of repairs.
- Develop and implement a preventative maintenance programme.
- Plan and manage the installation of new equipment and machinery.
- Lead, train, and support the engineering team to ensure skill development and operational efficiency.
- Manage and deliver engineering projects successfully.

Skills & Experience

- A relevant craft apprenticeship or third-level qualification.
- Strong engineering and maintenance management experience.
- Experience in processing/manufacturing environments, ideally with an electrical or maintenance focus.
- Proven diagnostics and troubleshooting skills.
- Familiarity with plant utilities and related systems.

This is an exciting opportunity for an experienced engineering professional to take a leadership role and make a tangible impact on the efficiency and performance of our operations.

- **Sector:** other service activities
