### Job Description

Multiple Locations :

- Lisbon, Portugal,

•

Glanua Ltd is a progressive organisation in water and wastewater services. Due to continued success in the Irish Business, the company is expanding with several dynamic and exciting roles. They are looking to recruit a Revit Technician to work on ample-scale water and wastewater infrastructure projects. This will be an office-based role in our new Technical Design Office in Lisbon – (Portugal).

Attributes:

Excellent communication & organisational skills

Looking to continuously improve their skillset

Keen interest in innovation and emerging technologies

Experience in Revit model and Family Creation

Experience in Navisworks manage

Experience in BIM 360

Experience working to timelines in a project environment

Ability to work off their own initiative but also as part of a project team

Primary Duties and Responsibilities:

The main duties and responsibilities of the Revit Technician are outlined as follows:

Manage the production of multi-discipline coordinated models, drawings and schedules.

Align design development with the project BIM execution plan – which would include regular coordination and model checks and sharing of model data throughout the design team.

Liaising between Mechanical & Electrical Designers and Civil & Structural Designers

Production and maintenance of MIDP throughout the project.

Participation in drawing/design reviews and facilitation of feasibility studies.

Liaising with project teams to ascertain project needs and timelines for same.

Taking instructions from Engineers and producing drawings with limited supervision or direction

Use initiative and knowledge to support the CAD team and grow expertise in the use of CAD software and other tools

Work as part of a team in delivering one or more projects at any one time, embracing the ethos of a “one team” culture.

Knowledge, Skills, and Experience:

The prior knowledge, skills and experience required of the Revit Technician are outlined as follows:

3rd level qualification in Electrical Engineering, Mechanical Engineering, Building Services Engineering or Strong trades background coupled with a BIM qualification.

A minimum of 3+ years' experience within a BIM Co-ordination function.

Mechanical or Electrical background and have a proven track record in a similar role.

Strong communication and organisational skills.

Ability to work under pressure and to short deadlines.
