HVAC Design Engineer

Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

Job Description

Location: Dublin, Ireland (Office-based)

Company: Eftech Ltd. – www.eftech.ie

About Eftech

Eftech Ltd. is a specialist supplier of commercial kitchen ventilation, air filtration, and HVAC systems. We design, supply, and support energy-efficient solutions for foodservice, hospitality, and industrial environments across Ireland and Europe. Our focus is on technical excellence, sustainability, and improving indoor air quality through innovative engineering.

Role Overview

We are seeking an experienced HVAC Design Engineer to join our growing technical team. The ideal candidate will have hands-on experience in HVAC design, proficiency in AutoCAD (and/or Revit), and a strong understanding of ventilation and air handling systems for commercial or industrial applications.

Key Responsibilities

Design and develop HVAC and ventilation systems for commercial kitchens and buildings.

Produce detailed AutoCAD drawings, schematics, and technical documentation.

Perform heat load and airflow calculations, equipment selection, and duct sizing.

Liaise with clients, consultants, and contractors to ensure project requirements are met.

Collaborate with internal teams on product integration and system optimisation.

Ensure compliance with relevant Irish, UK, and European standards and regulations.

Requirements

Degree or diploma in Mechanical / Building Services Engineering (or equivalent).

3+ years of experience in HVAC design or building services.

Proficiency in AutoCAD; Revit or BIM experience advantageous.

Strong understanding of ventilation, air filtration, and energy recovery systems.

Familiarity with CIBSE / ASHRAE design standards.

Excellent communication and technical reporting skills.

Ability to work independently and as part of a multidisciplinary team.

Why Join Efecth

Be part of an innovative company advancing sustainable air and ventilation technologies.

Work on a diverse range of high-profile commercial projects.

Competitive salary and opportunities for professional development.

Supportive, collaborative working environment.

- **Sector:** professional, scientific and technical activities

Career Level

- Experienced [Non-Managerial]
