ICF and Structural Concrete Mason

Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

Job Description

Duties include

Install Insulated Concrete Formwork (ICF) systems in accordance with architectural and structural specifications, including reinforcement integration and structural layout preparation.

- Pour, level, and finish concrete within ICF assemblies, ensuring accurate consolidation, curing, and alignment per engineering and manufacturer standards.
- Read and interpret technical drawings, layout plans, and installation manuals for both ICF and conventional blockwork/masonry systems.
- Construct walls, partitions, and foundations using a range of materials including concrete blocks, clay bricks, and ICF units.
- Shape, cut, and brace ICF blocks to suit structural and service requirements, including complex junctions and openings for mechanical, electrical, and plumbing installations.
- Apply finishes such as render and waterproofing to both ICF and masonry surfaces as required for building envelope performance.
- Ensure full compliance with Irish building codes, fire safety regulations, thermal insulation requirements, and on-site health and safety practices.
- Lay bricks, concrete blocks, and stone using mortar or adhesive as part of broader building systems, including facades, retaining walls, and internal partitions.
- Collaborate with site engineers, architects, and tradespersons to ensure accurate sequencing and integration of ICF and masonry components in line with project timelines.
- Conduct on-site inspections and adjustments to maintain quality and dimensional tolerances.

What are we looking for:

- Willing to learn masonry and ICF.
- Strong understanding of construction drawings and building regulations.
- Ability to work in construction team.

- **Sector:** construction
