## Service Engineer - Fire Systems

### Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

### Job Description

#### Job Description

Rottguard Fire Systems Ltd is seeking a Service Engineer – Fire Systems to support the Managing Director in the installation, servicing, maintenance, and commissioning of fire suppression systems across Ireland.

The role involves hands-on technical work both on-site and in the workshop, supporting fire system installations, system preparation, servicing activities, and project delivery in line with company safety and quality standards.

#### Key Responsibilities

- Assist with the installation, servicing, and maintenance of fire suppression systems
- Support system testing, inspections, and commissioning activities
- Assist with routine maintenance and fault identification
- Prepare and handle fire system components and cylinders in line with safety procedures
- Travel to project sites and assist with on-site works
- Support workshop and store organisation, tools, and stock control
- Complete basic service documentation and job reports
- Comply with all health, safety, and fire regulations

#### Skills & Experience Required

- Technical background in maintenance, electronics, or engineering support roles
- Experience assisting with installations or servicing of technical systems
- Strong safety awareness and ability to follow procedures
- Good organisational and reporting skills
- Ability to work independently and as part of a small specialist team
- Willingness to complete required Irish safety training (e.g. Safe Pass)

#### Qualifications

Technical qualification in Electronics, Engineering, or related discipline

Fire safety or maintenance-related training is an advantage

- **Sector:** construction
