## Quality Assurance Technician (Construction)

### Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

### Job Description

Job Description:

Cumnor Construction Ltd is a well-established construction company delivering residential, commercial and civil engineering projects across Ireland. Due to ongoing project requirements, we are seeking to recruit a Quality Assurance Technician to support engineering and site teams through quality assurance, inspection, testing and compliance activities.

This is a technical role focused on ensuring construction works, materials and processes meet required specifications, standards and regulatory requirements. The position combines site-based inspections with documentation, testing and quality system support and is suitable for candidates with a technical or quality qualification.

Key Responsibilities:

The successful candidate will be responsible for the following duties (not an exhaustive list):

#### Quality & Technical Duties (Primary Focus)

- Carrying out site-based quality inspections on construction activities to ensure compliance with drawings, specifications and standards

- Assisting engineers and site management with quality control and assurance processes

- Conducting and recording material inspections and basic testing (e.g. concrete, aggregates, workmanship checks)

- Monitoring construction processes to identify defects, non-conformances or deviations from specifications

- Maintaining accurate quality records, inspection reports, checklists and test results

- Assisting in the preparation and review of Inspection & Test Plans (ITPs) and quality documentation

- Supporting internal audits, site audits and compliance checks

- Liaising with subcontractors and suppliers on quality-related issues

Assisting with the implementation and continuous improvement of the company's quality management systems

#### Support & Site Coordination Duties (Secondary)

Providing technical support to site teams where required

Coordinating with site supervisors to ensure corrective actions are implemented

Supporting health, safety and environmental compliance in conjunction with quality activities

Participating in site meetings related to quality and technical compliance

#### Requirements:

Relevant qualification in Quality, Engineering, Construction Technology or related discipline (minimum NFQ Level 6 or equivalent)

Previous experience in a construction, engineering or quality assurance environment

Strong understanding of construction drawings, specifications and quality standards

Good written and verbal communication skills

Ability to work independently and as part of a multidisciplinary site team

Strong attention to detail and record-keeping skills

Competent in basic IT systems (reports, spreadsheets, digital quality records)

#### Benefits:

21 days annual leave plus public holidays.

CWPS Pension scheme
