Network Engineer

Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

Job Description

Architect, deploy, and maintain highly available WAN, LAN, and WLAN infrastructures across geographically distributed business locations.

Design and implement secure site-to-site and remote-access VPN solutions to ensure reliable connectivity between central systems and branch locations.

Configure, optimise, and manage enterprise-grade routing and switching technologies, including dynamic routing protocols such as OSPF, BGP, and EIGRP.

Lead the deployment and ongoing management of SD-WAN solutions to improve performance, resilience, and cost efficiency across multiple locations.

Implement advanced network security controls, including firewalls, IDS/IPS, network segmentation, and zero-trust access models.

Key Requirement:

Manage complex WAN, LAN, and WLAN environments across multiple geographically distributed locations.

Deliver and support SD-WAN, VPN, and high-availability network solutions in live production environments.

Perform advanced troubleshooting and root-cause analysis for critical network incidents.

Work closely with service providers, vendors, and internal stakeholders to deliver resilient connectivity solutions.

- **Sector:** wholesale and retail trade; repair of motor vehicles and motorcycles
