Digital Transformation Specialist

Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

Job Description

Role Summary:

Supports the digital transformation and IT-enabled operations of a healthcare staffing service by optimizing workflows, implementing and integrating CRM systems, coordinating cross-functional stakeholders, and contributing to the design, testing, and enhancement of digital platforms and applications.

Functions:

- Develops, implements, and maintains digital workflows and processes to improve operational efficiency and staffing management.
- Configures and administers CRM and digital systems to support client engagement, data tracking, and sales processes.
- Conducts business and operational analysis to support compliance alignment, system improvements, and operational effectiveness.
- Coordinates with internal teams, clients, and external technology partners to deliver system updates, process improvements, and digital initiatives.
- Designs, tests, and enhances digital applications and IT solutions to ensure quality, functionality, and alignment with operational requirements.
- Monitors operational systems and digital processes to identify risks, inefficiencies, and opportunities for improvement.
- Provides guidance on the adoption and effective use of digital tools across operational teams.

Requirements:

- Degree or equivalent qualification in IT, Computer Science, Digital Technology, or related field, or significant relevant experience.
- Hands-on experience with CRM and digital platforms and workflow management systems.
- Knowledge of IT systems, digital applications, and process optimization within operational contexts.
- Ability to liaise effectively with multiple stakeholders, including internal teams, clients, and external technology partners.

- Strong analytical and problem-solving skills with attention to system accuracy, operational quality, and digital performance.
- Familiarity with digital transformation initiatives, application testing, and process improvement methodologies.
- Effective communication and coordination skills to support cross-functional digital projects.

- **Sector:** administrative and support service activities
