Job Description

Our mission is to improve energy efficiency and reduce carbon footprints across various industries. Join the rapidly growing renewable energy industry & become a key influencer driving positive change in the way we harness energy

Responsibilities:

Responsible for general domestic heating and plumbing installations with an emphasis on underfloor heating and air to water heat pump installations.

Completion of all necessary service/installation documentation and submission to office in a timely manner.

Integrate existing plumbing infrastructure with renewable energy systems to ensure seamless operation and maximum efficiency.

Conduct routine maintenance and repairs to ensure optimal performance and longevity. This may involve inspecting pipes, valves, and other components for leaks, blockages, or corrosion.

Adhere to company compliance and safety standards when installing, maintaining, or repairing.

Troubleshooting and Problem-solving: diagnostic tools, conducting tests, and implementing corrective measures to restore functionality.

Requirements:

Fully qualified plumber, demonstrating your solid foundation in the field.

Over 3 years of hands-on experience as a plumber in either domestic or commercial settings.

Familiarity with Solar PV is a major advantage, showcasing your adaptability.

Your commitment to health and safety is unwavering, and your attention to detail is unparalleled.

Demonstrate a vast knowledge of the heating and plumbing industry and show a proven track record in previous similar roles.

Be capable of building positive working relationships to deliver high levels of customer service

Hold a full clean driver's license, enabling you to move efficiently between project sites.

Safe Pass & Manual Handling Certificate obtained.

Time management and organizational skills.

What we offer:

A competitive salary package.

Healthcover with Laya Healthcare.

Provision of a company van, fuel card, and mobile phone.

Participation in our pension scheme.

Employee Assistance Program.

Death in Service Benefit.

An excellent work-life balance.

Opportunities for professional development and career advancement.

The chance to be part of a company at the forefront of sustainable energy solutions.

A supportive and collaborative work environment.
