## Substation Technician

### Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

### Job Description

Overview of role:

This role would suit candidates who are passionate about working on power distribution networks. The successful candidate will assist with the installation, maintenance, repair and testing of electrical substations and their associated equipment.

Key Responsibilities:

- Assist in the installation and maintenance of all electrical and mechanical equipment in Electrical Substations.
- Installations of Transformers, MV and HV Switchgear (indoor and outdoor), Protection Panels, AC & DC & related instrumentation.
- Install and terminate Cable LV/MV/HV (indoor and outdoor).
- Installs and pre-commissioning control and distribution apparatus, such as switches, relays, and circuit-breaker panels.
- Install and level steel structures for electrical apparatus (indoor and outdoor)
- Install conduit (pipes or tubing) inside designated partitions, walls, or other concealed areas, and pull insulated wires or cables through the conduit to complete circuits between panels.
- Pre-commissioning works - Test electrical systems and continuity of circuits in electrical wiring, equipment, and fixtures, using testing devices, to ensure compatibility and safety of system.
- Understand circuit diagrams and perform troubleshooting.
- Assemble and install electrical panels, wire harnesses, and other electrical equipment.
- Assist and complete installation, modification, and repair on high voltage distribution systems such as switchgear, transformers, circuit boards.
- Consult with relevant stakeholders in project implementation to achieve project and company goals.
- Ensure compliance with Health & Safety and Construction Regulations and Construction Quality Assurance.

To be considered for the Substations Technician position you will Ideally have the following:

- Knowledge of AC and DC systems
- Electrical Transmission experience
- Minimum 4 years' experience working on substations
- Level 6 Advanced Certificate Craft – Electrical (or equivalent) preferred
- Experience with ESB and Eirgrid environments is an advantage
- Medium and High Voltage experience is an advantage
- Full Driving Licence would be an advantage
- Willingness to travel and work away at customer sites
