Job Description

Job Title: Saw Doctor

The Role:

We are seeking a motivated Saw Doctor to join our team. The successful candidate will have Level 3 Saw doctoring certificate. The successful candidate will assist the Senior Saw Doctor and be trained in all aspects of saw blade sharpening, repair, and maintenance within a highly automated timber sawmill environment. This role involves a variety of tasks that ensure the efficiency and reliability of our cutting equipment by performing regular assessments, repairs, and troubleshooting. The ideal candidate will have a mechanical aptitude, an ability to work independently, and a commitment to maintaining high safety and quality standards. The ideal candidate should be willing to work either day or evening shift as the role requires it.

Responsibilities:

Assist the Senior Saw Doctor in all activities related to the sharpening, repair, and maintenance of saw blades.

Perform routine saw blade changes and ensure their proper functioning within timber sawing machines and also inspecting the saws for any defects on an ongoing basis

Sharpening and repair of all bandsaw and circular saw blades required for multiple different timber sawing machines

Complete assessment of all blades for alignment, tension and defects etc

Re-tipping and sharpening of both circular and band saw blades using specialised automated equipment

Removal and re-install of all repaired and resharpened blades into all saw types within a highly automated timber sawmill machinery environment

Responsible for the procurement, management and repair of all blades across multiple machine types including band saws, Circular saws, Chipper heads, planers moulders and trim saws.

Fault finding analysis of cutting errors in the timber and working to resolving same with the mechanical maintenance team.

Enforce safety standards and ensure compliance with all company policies, procedures, and health and safety regulations

Maintain a high standard of quality across all production outputs, ensuring all products meet company specifications and customer expectations

Participation in ongoing training and development

Assist in other departments as needed, offering flexibility to support the business's evolving needs

Requirements:

Level 3 Certificate in Saw Doctoring

A strong work ethic and a high level of self-motivation to complete tasks with minimal supervision

Basic mechanical/engineering understanding, with experience or knowledge in tool making, mechanical fitting, or similar areas being an advantage

Attention to detail, ensuring high-quality standards in all work completed

Good PC skills for managing data and reports and interacting with PLCs

Ability to work well within a team, but also the capability to take initiative and complete tasks independently

Ability to work under pressure, maintaining focus and quality even in challenging environments
