Project Engineer

Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

Job Description

The successful candidate will be become part of the Planning & compliance team based in the Ballymount, Dublin headquarters. The candidate will be responsible for dealing with all construction works at the existing waste management facilities that the company has in operation throughout the country. The Candidate will then transition in becoming the Site Engineer for all future large waste facility developments currently proposed at a number of locations throughout the country.

The Role:

Report to Senior Management.

Responsible for co-ordinating site repairs, maintenance and future extensions at all the existing waste facilities. Liaising with Operation management to assist in all plant upgrade, equipment retrofits and capital replacement projects at the existing waste facilities.

Responsible to work on future large waste facility developments which will include site supervision & co-ordinate with in-house and external contractors. Responsible to ensure quality standards of work is maintained at all times. Co-ordinating with PSCS, PSDP and all other stakeholders to include local authorities and Building control.

Supporting the Environmental Compliance team and Health & Safety Management to ensure full continuous compliance specifically relating to all necessary site infrastructure works to include repair, maintenance and installation at all existing and future Waste Licences issued by the Environmental Protection Agency (EPA) and Waste Facility Permits issued by local authorities.

This role gives the successful candidate a great opportunity to showcase their organisational and project management skillset within a company that can offer career progression opportunity in the future.

Key Requirements:

Degree in Civil / Structural Engineering related qualification essential (Environmental Engineering background beneficial). Ideally, 2+ years experience in a similar site engineer or project engineer role.

Ability to work on own initiative and effectively manage & coordinate site activities. Practical Health & Safety experience in both site activities and design assessment. Good communication and presentation skills. Full Safety Qualifications.

Strong knowledge of MEP systems

Ability to review interpret and ensure compliance with MEP drawings and specifications

Familiarity with project management principles

Understanding of structural design (eg steel and reinforced concrete)

Ability to read structural drawings coordinate design details and support structural- relation tasks

Full understanding of design drawings. Production of documentation, including reports, drawings, calculations, specifications, tender documentation, project delivery plans. Experience with AutoCAD essential.

Own car with clean driving license.

Benefits:

On-site parking.

Life insurance.

Company pension Scheme.

Employee discounts.
