## Internal Technical Engineer

### Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

### Job Description

Job Description:

The key technologies in which the successful candidate will specialise are the following.

Heat Pump Technology

Solar Technology

Domestic and Commercial Gas & Oil Boiler Technology

Domestic Hot Water Solutions

Heat Recovery Ventilation

Job Description:

As an Internal Technical Engineer, you will use your technical knowledge along with sales skills to provide advice and support on a range of heating products, for which specific training will be provided.

You will assist colleagues with quotations, designs and specifications for new clients from a technical perspective.

Clients are usually technical staff from non-retail organisations, such as boiler installers, mechanical contractors, architects, and mechanical consultants

The emphasis of the work varies depending on the level of technical knowledge needed to sell a product or service.

Technical sales engineers are a key point of contact for clients and provide both pre and after-sales advice. You will work alongside others in the technical sales team and liaise regularly with colleagues from a range of other departments, such as:

Sales

Technical help

Distribution

Accounts

Senior company managers

## Responsibilities

As a technical sales engineer for Precision Heating Ltd, you will need to:

search for new clients who might benefit from company products or services and maximise client potential in designated regions

develop long-term relationships with clients, through managing and interpreting their requirements

persuade clients that a product or service best satisfies their needs in terms of quality, price, and delivery

calculate client quotations and administer client accounts

provide pre-sales technical assistance and product education

work on after-sales support services and provide technical back up as required

arrange and carry out product training

analyse costs and sales

meet regular sales targets and coordinate sales projects

make technical presentations and demonstrate how a product meets client needs

liaise with other members of the sales team and other technical experts

help in the design of bespoke heating systems

provide training and produce support material for other members of the sales team

## Qualifications:

Degree/cert in Building Services/Mechanical Engineering

From 0-3 years' experience in the heating industry

## Skills:

a solid technical background

sales skills

communication skills

- **Sector:** construction

## Career Level

- Entry Level
