Construction - Mechanical Estimator Senior Position

Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

Job Description

Multiple Locations :

- Co. Galway,

We are seeking an accomplished and highly proficient Senior Mechanical Estimator to join Glanua, a recognised leader in the water and wastewater sector. This role will be central to the success of our tendering activities across major municipal programmes for Uisce Éireann and AMP8 frameworks with Thames Water, United Utilities and Yorkshire Water. The successful candidate will bring strategic insight, technical depth and the ability to shape competitive, high quality proposals that reflect Glanua's commitment to excellence.

As a senior member of the pre-construction team, you will prepare analytical and accurate estimates for mechanical works, ensuring that all proposals are grounded in strong engineering principles and an appropriate level of commercial risk. You will collaborate closely with our design, project management and procurement teams to develop solutions that are cost effective, buildable and aligned with client performance expectations.

You will play a key role in assessing the constructability of designs, selecting suitable materials, identifying opportunities for innovation and ensuring that Glanua positions itself at the forefront of technical and commercial delivery. You will also provide informed and timely pricing guidance during the early stages of tenders, supporting optioneering, budget development and strategic decision making. The role therefore demands a deep understanding of mechanical systems used in water and wastewater treatment, together with a clear appreciation of market trends, supplier capability and emerging technologies.

You will ensure that all governance and risk management processes are rigorously followed and fully documented. Your leadership will contribute to the development of tender programmes, staff scheduling, procurement strategies and commercial submissions that reflect Glanua's high standards of accuracy, integrity and professionalism. This is a pivotal position for a senior professional who can operate confidently under pressure, manage multiple priorities and influence

the success of high value, technically complex projects.

Main Duties and Responsibilities:

The main duties and responsibilities of the Senior Mechanical Estimator are outlined as follows:

Estimate Preparation

Develop detailed, accurate and fully evidenced mechanical estimates based on drawings, specifications and tender documentation.

Ensure estimates reflect realistic construction risk, align with Glanua governance and adhere to relevant industry standards.

Design Development Participation

Engage actively in design development to assess buildability, installation methods, material selection and opportunities for innovation.

Provide early stage cost guidance during tendering to support

Risk and Governance Compliance

Ensure all risk management, commercial governance and approval procedures are followed.
