## EHR Ambulatory Build Team Member

### Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

### Job Description

The Ambulatory & Sports Medicine Build Team Member will support the implementation of the Electronic Health Record (EHR) system across UPMC Ireland. Reporting to the Ambulatory & Sports Medicine Workstream Lead, this role focuses on assisting with the configuration, testing, and validation of ambulatory and sports medicine-related applications, including the Ambulatory module and supporting capabilities, with a primary focus on Sports Medicine and Health Initiative services.

#### Responsibilities:

Serve as a supporting subject matter expert (SME) for ambulatory and sports medicine-related functions in MEDITECH Expanse, including the Ambulatory module and supporting capabilities.

Assist in the design and validation of ambulatory and sports medicine workflows within MEDITECH Expanse and associated applications, working closely with analysts and operational leaders.

Review and provide feedback on system functionality related to ambulatory and sports medicine processes.

Support the integration of ambulatory and sports medicine workflows with financial processes to ensure clinical/financial integrity and compliance with quality requirements.

Assist in ambulatory and sports medicine system configuration, data migration validation, and integration with existing or planned enterprise platforms.

Participate in testing activities for ambulatory and sports medicine modules, including integrated testing and user acceptance testing (UAT), under the guidance of the Ambulatory & Sports Medicine Workstream Lead.

Help identify and troubleshoot issues in collaboration with IT, finance, and clinical teams.

#### Required Qualifications:

Clinical degree in Nursing, Physiotherapy, Athletic Therapy, Kinesiology, or a related discipline, or equivalent experience in ambulatory and sports medicine care settings.

Registration in good standing with appropriate professional college or regulatory body, if applicable.

Minimum 3 years of experience in an ambulatory or sports medicine care setting.

Familiarity with outpatient workflows, clinical documentation, and interdisciplinary care models.

Good project coordination, stakeholder engagement, and change management skills.

Good analytical thinking, problem-solving, and interpersonal skills with the ability to work across clinical and operational teams.

Preferred Qualifications:

Minimum 2 years of experience supporting or leading system implementations (preferably MEDITECH or similar ERP/EHR platforms).

Experience as a user of MEDITECH Expanse ambulatory modules or equivalent capabilities with other major EHR systems (e.g., Epic, Oracle Health).

Experience implementing MEDITECH ambulatory capability or equivalent capabilities with other major EHR systems (e.g., Epic, Oracle Health).

Knowledge of clinical decision support, change management methodologies (e.g. ADKAR), and regulatory requirements (e.g., documentation standards, medication safety protocols).
