Commercial Catering Engineer

Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

Job Description

Join Kaneco – One of Ireland's Leading Commercial Kitchen Specialists

Dublin & Surrounding Areas

At Kaneco, we don't just design and build high-performance commercial kitchens – we create the heart of some of Ireland's busiest and most iconic food destinations. From Michelin-starred restaurants to global blue-chip companies and leading hotel chains, our work powers the kitchens that keep Ireland cooking.

As our Service Department continues to grow, we're looking for Commercial Catering Engineers to bring their skills, energy, and passion for problem-solving to our team.

Why Join Kaneco?

Variety Every Day – No two jobs are the same. You may be troubleshooting gas equipment in a hotel one day and fine-tuning ware washing systems in a corporate headquarters the next.

Work with a Diverse Client Base – Our customers range from blue-chip companies to restaurants and hotel groups, giving you exposure to the latest technologies and a wide range of industry sectors.

A Role Beyond Engineering – This is a customer-facing, field-based position where you will build strong relationships and represent a company recognised for expertise and quality service.

Opportunities for Growth – As our service department continues to expand, you will have the chance to develop your skills and progress within the business.

Key Responsibilities

Service, maintenance, and breakdown repair of commercial gas and electric kitchen equipment.

Carrying out planned preventive maintenance in line with client requirements.

Installation, testing, and commissioning of a wide range of catering equipment.

Applying a problem-solving and solutions-based approach to ensure business continuity in fast-paced environments.

Managing daily workload independently and completing reporting via mobile device.

Ensuring full compliance with health, safety, and environmental regulations on site.

Supporting colleagues by sharing knowledge and experience with other engineers, apprentices, and non-technical staff.
