Thermal Metal Cutter

Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

Job Description

Job Description:

We are seeking a highly skilled and experienced Thermal Metal Cutter to join our industrial metal engineering and vehicle structural decommissioning operations. The successful candidate will be responsible for the precision thermal cutting, profiling, and skilled structural extraction of light, heavy commercial vehicles and complex industrial metal structures.

Key Responsibilities:

- Perform high-precision thermal profiling and cutting of structural ferrous and non-ferrous components using specialized oxy-fuel systems, plasma arc torches, and thermal lancing technology.
- Read and execute complex technical blueprints, cutting plans, and engineering drawings to ensure safe structural integrity during precision decommissioning.
- Execute tactical structural separation of commercial chassis, heavy plant trailers, and industrial metal frameworks, ensuring component metal preservation.
- Utilize manual welding and equipment to stabilize heavy structures during cutting operations
- Conduct routine precision inspections and calibration of specialized high-temperature cutting apparatus.

Requirements:

- Minimum 2 years' proven experience as a qualified Thermal Metal Cutter, Fabricator, or Industrial Welder.
- Proven ability to interpret engineering schematics, physical blueprints, and exact technical measurements.
- Physically fit and capable of performing manual work, including handling metal components and working in industrial conditions.
- Ability to work independently and as part of a team.

- **Sector:** wholesale and retail trade; repair of motor vehicles and motorcycles

Career Level
