Steel Assembly Technician

Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

Job Description

The Steel Assembly Technician is part of the team that assembles steel components, tack welds and bolts steel structures and modular components prior to final-fix of aluminium, timber and glass. The fabrication and assembly of these steel components require meticulous attention to detail to ensure seamless installation on site.

This role would be particularly suited to those with a mechanical aptitude, moderate welding abilities and an ability to read and interpret 3D technical drawings and 3D models.

Health and Safety is a priority and therefore in the role of Steel Assembly Technician you are required to adhere to all Personal Protective Equipment (PPE) requirements and safety instructions at all times.

Main duties include:

Measuring, squaring, bolting, banding and assembling steel components

Tack welding and/or bolting assembly components

Ensuring all parts are finished to the high standards required

Gathering and movement of materials as required

Preparation and loading of items for transport

Ad hoc tasks as required

Undertake training as required for role

Minimum requirements of the Steel Assembly Technician:

Proven experience in the assembly of steel components

Experience in metal fabrication, steel erection and/or welding

Working knowledge of a manufacturing environment would be beneficial

Ability to read and interpret 3D technical drawings and 3D models

Undertake training as required

Flexibility to move between projects

Basic IT skills

The Steel Assembly Technician role requires a minimum of 39 hours per week, Monday to Friday. A reasonable level of overtime and availability to work two cycle shift and Saturdays may be required to ensure the fulfilment of the requirements of this role.

Training will be provided by O'Carroll Engineering.
