Construction - Site Manager - Barnsley

Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

Job Description

The main duties and responsibilities of the Site Manager are outlined as follows:

Responsible for mobilisation and demobilisation of our worksite/s.

Co-ordinate and control construction activities ensuring the project runs to schedule and budget.

Day to day management of site activities, including supervising and monitoring the site operations and carrying out briefings as necessary, preparing RAMS and ensuring compliance.

Key onsite contact for all Project stakeholders, clients, supply chain partner and visiting parties.

Ensuring plant and materials are ordered and supplied as required in a timely manner.

Checking drawings and quantities, ensuring that the information is accurate for the work.

Always promote exceptional safety and delivery quality standards.

Ensuring that activities are planned, organised and monitored to ensure safety, time constraints and quality requirements are met.

Ensuring that all site non-conformities are reported and resolved.

Ensure all cost aspects are managed proactively and controls are in place.

Forecasting and management of supervision and direct labour across worksites.

Overall ownership and accountabilities for their worksites.

Skills/experience required:

HND in engineering/project management related qualification

Experience within the water treatment industry (Non-Infrastructure) large scale projects

IOSH or SMSTS Safety Management

CSCS Management Card

TWC

First Aid

About Us:

At Glanua, we have the capacity and experience to provide complex project solutions for the water and wastewater industry and design, construction, operation, and maintenance of water and wastewater infrastructure. Glanua strives to offer complete solutions to clients by utilizing the best available technology and the most modern equipment combined with innovative engineering

solutions that are tailored to what they need. We always adopt the most up to date specifications and operate all our infrastructure to the highest safety, quality, and environmental standards.

Our vision is to be our customers' most valued partner delivering excellence in water and wastewater engineering, fulfilling their demands for Regulatory, Sustainability and Circular Economy Environmental Solutions and thus creating a cleaner planet for all.

Our mission is to be a leader in the water and wastewater industry in Ireland, the UK, and selected other countries by providing innovative technology - based engineering solutions which meet the regulatory, sustainability and circular economy needs of our customers, while positively impacting the environment for all.

We have a talented team of 400 people across Ireland and the UK and are rapidly expanding our workforce across several disciplines to meet our ambitious growth plans, particularly for the UK.
