Plant Team Leader

Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

Job Description

Ballybofey, Co. Donegal | Full-time, Permanent

At Glenmore Farming Group, we're committed to building a more sustainable future through innovation in agriculture and renewable energy. Operating across dairy farming, land management, haulage, and anaerobic digestion, we're investing in our people and our facilities as we continue to grow.

We are now seeking an experienced Plant Team Leader to join our Anaerobic Digestion Plant in Ballybofey.

This is a fantastic opportunity for a motivated engineering professional to step into a hands-on leadership role within one of Ireland's growing renewable energy businesses. Reporting to the Plant Manager, you will lead a team of approximately 10 engineers, ensuring the safe, efficient, and reliable operation of our anaerobic digestion facility.

This role combines technical expertise with people leadership. You'll be responsible for coordinating daily activities, supporting preventative and reactive maintenance, monitoring plant performance, and ensuring the highest standards of health, safety, and operational excellence. Whilst this is a supervisory position, we're looking for someone who enjoys remaining hands-on and is willing to work alongside the team whenever required.

What you'll be doing

Lead, motivate, and develop a team of plant engineers.

Plan and coordinate daily engineering and maintenance activities.

Support the day-to-day operation of the anaerobic digestion plant.

Carry out electrical and mechanical fault finding, repairs, and preventative maintenance.

Work closely with the Plant Manager to maximise plant reliability, efficiency, and performance.

Promote a positive safety culture and ensure compliance with all health, safety, and environmental procedures.

Support continuous improvement initiatives to improve plant performance and reduce downtime.

Maintain accurate maintenance records and communicate effectively across operational teams.

What we're looking for

An engineering qualification with a strong electrical bias.

Previous experience leading or supervising engineering or maintenance teams.

Strong fault-finding and maintenance experience within an industrial, manufacturing, utilities, renewable energy, or process environment.

A practical, hands-on approach with excellent leadership and communication skills.

A commitment to safety, quality, and continuous improvement.

Experience within anaerobic digestion, biogas, renewable energy, manufacturing, or utilities would be highly advantageous.

Why join Glenmore Farming Group?

This is more than just another engineering role. It's an opportunity to become part of a progressive business that's investing in renewable energy, sustainable agriculture, and its people.

We offer:

Competitive salary and benefits package.

Ongoing training, development, and career progression opportunities.

The opportunity to work with modern plant, equipment, and technology.

A supportive, collaborative, and forward-thinking working environ

- **Sector:** electricity, gas, steam and air conditioning supply
