Construction - Civil Estimator

Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

Job Description

The main duties and responsibilities of the Civil Estimator are outlined as follows:

Estimate Preparation

Prepare detailed and accurate civil engineering estimates based on drawings, specifications and tender documentation.

Ensure estimates reflect appropriate levels of construction risk and align with company guidelines and industry standards.

Participation in Design Development

Support the design development process by evaluating buildability, construction sequencing and material selection.

Provide early stage pricing to support optioneering, budget development and identification of cost effective solutions.

Risk and Governance Compliance

Assist in ensuring that risk management, governance and approval procedures are followed and fully documented.

Prepare clear assumptions, exclusions and clarifications that support robust tender submissions.

Tender Preparation

Contribute to tender preparation and construction programmes.

Support the development of staff schedules and resource plans based on civil engineering delivery needs.

Procurement Planning

Work with procurement teams to identify suitable civil subcontractors and suppliers.

Issue enquiries, review responses and secure competitive quotations for groundworks, concrete, formwork, rebar, pipelines and associated civil works.

Technical and Industry Awareness

Maintain an up to date understanding of construction methods, civil engineering technologies and sector developments.

Apply this knowledge to enhance the accuracy, relevance and competitiveness of estimates.

Financial Modelling Support

Assist in the development of financial models for tenders and frameworks, including labour, plant, materials and civil production rates.

Support internal price fix meetings with clear cost insight and supporting information.

Cost Coding and Feedback

Use the standardised cost coding system to support financial tracking, benchmarking and continuous improvement.

Provide feedback to strengthen estimating tools, cost libraries and civil production rates.

Knowledge, Skills and Experience:

The main knowledge, skills and experience required of the Civil Estimator are outlined as follows:

Experience

5 to 10 years of experience in civil estimating in the water, wastewater or wider infrastructure sectors.

Experience preparing civil engineering estimates for treatment plants, pipelines, earthworks or similar construction projects.

Skills

Strong analytical and numerical skills with a high level of attention to detail.

Solid understanding of civil engineering principles and construction methodologies.

Competence in estimating software, digital take off tools and Microsoft Office applications.

Effective communication and interpersonal skills with the ability to work collaboratively with multidisciplinary teams.
