Aircraft Mechanic

Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

Job Description

Atlantic Flight Training Academy (AFTA) are currently recruiting for an Aircraft Mechanic to support our aircraft engineering department based at Cork Airport, Ireland. This is an exciting opportunity for someone with a mechanical background and experience to join a dynamic team and transition or continue in the fascinating world of aviation!

AFTA operate a large fleet of Cessna 172, Diamond DA42, Vulcanair P68 & Slingsby aircraft training domestic and international cadets for some of the world's largest airlines and using the Vulcanair P68 aircraft to support our aerial survey division. The successful candidate will be part of the team that maintains this fleet, liaising with our flight operations team to carry out routine 100hr, 200hr checks, scheduled and non-scheduled maintenance, annual checks and defect rectification.

The ideal candidate will be an ambitious and driven individual, with a keen interest in aviation, who dreams of expanding their transferable mechanical skills within the general aviation industry. The opportunity to progress to certified EASA Aircraft Engineer will be offered to individuals that show the right attitude and ambition to progress.

Responsibilities

Repair, inspect and maintain the structural, mechanical and electronic elements of the aircraft, measuring wear and assessing whether parts need repair or replacement.

Perform aircraft maintenance (scheduled and non-scheduled) in accordance with technical documentation and company procedures.

Conduct routine and special inspections as required by regulations.

Clean, refuel, and change oil in line service aircraft.

Complete all relevant paperwork and administration duties as required

Communicate & co-operate with the Chief Engineer and the rest of the engineering team in a safe, professional and helpful manner.

Support the engineering team with the delivery and management of parts, stock and fuel.

Successful candidate requirements

Minimum of 2 years' experience as a car mechanic or other similar engine/mechanical experience.

The successful candidate will ideally be someone who has experience working with light aircraft or a

demonstrated interest in working on light aircraft engines, airframes and aircraft components

Must be willing to learn, reliable and flexible and is by nature, detail oriented.

Computer literate, with working knowledge of Microsoft Software Programs

Ability to hold airport restricted zone access.

Sound technical knowledge

Good English

Candidates will ideally have the right to live and work within the EU however we will sponsor an EU work permit for the right candidate.

Flexibility to complete tasks outside of normal working hours to ensure program deadlines are met.

(Aviation is a 365/7 days a week industry and our engineering department work after normal shift hours and weekend days when required.)

Employment Type: Full-time permanent employee, 39 hours per week
