Job Description

Endress+Hauser (Ireland) Ltd Global Logistics Operations Center based in Exchequer House, Embassy office park, Kill, Co. Kildare, W91W866 are currently recruiting for a Data Analytics Assistant

- Annual Salary €45k
- Hours of Work 37.5 hours weekly
- Fixed Term Contract – 2 years

Responsibilities in the Role will include:

Data Analytics & Reporting

- Collaborate closely with Global Logistics Operations Centre (G-LOC) teams to understand business challenges and identify data-driven solutions through data analytics.
- Analyse large datasets to identify trends, patterns, and opportunities for business improvement.
- Design, develop, and maintain reports, dashboards, and visualisations using Tableau or similar business intelligence tools.
- Translate complex business requirements into meaningful analytics solutions and recommendations.

Data Warehouse & Data Management

- Support the ongoing development and maintenance of the company Data Warehouse environment.
- Monitor data quality, integrity, and consistency across systems.
- Perform data validation, quality assurance, and plausibility checks.
- Assist with database performance monitoring, optimisation, security, and backup activities.

Business Collaboration

- Collaborate with business stakeholders to understand operational challenges and information

requirements.

- Gather, document, and analyse business and technical requirements.
- Support continuous improvement initiatives through data-driven recommendations.

Project Support

- Support the implementation of analytics and data infrastructure projects.
- Assist with system integration testing and user acceptance testing activities.
- Develop and maintain project documentation, process maps, and operating procedures.

Experience & Skills Required

- Graduates with a 2.2 honours degree at Level 8 in any discipline such as IT Systems, Computer Science, Mathematics, Physics (or other sciences), Actuarial Science, Data Analytics, Strategic Financial Management matched with relevant professional experience
- Proficiency in Tableau or other data visualization tools, with the ability to create insightful and impactful visualizations. Certification in Tableau (e.g., Desktop Specialist, Data Analyst) is a plus.
- Skills in SQL and machine learning are an advantage
- Proven experience of understanding data and building the bridge between IT know-how and business understanding, to transfer knowledge effectively between technical and business functions
- Proven ability to abstract and think analytically.
- Experience using problem solving skills to add value to the process
- Programming experience, familiarity with SQL and some data management and analysis software

Desirable

- Experience with SQL and database technologies.
- Knowledge of machine learning concepts and predictive analytics.
- Experience with Python, R, or other data analytics programming languages.
- Tableau certification or equivalent business intelligence certification.

- **Sector:** transportation and storage

Career Level

- Not Required
