Moulding Technician

Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

Job Description

Moulding Technician

Pale Blue Dot Recruitment is advertising this vacancy on behalf of MeHow Medical Ireland.

Position Overview

MeHow Medical Ireland is seeking a skilled Moulding Technician to join its manufacturing team in Bray, Co. Wicklow. The role is responsible for technical set-up, operation, process control, troubleshooting and support of injection moulding equipment to achieve defined production and quality standards.

Key Responsibilities

- Set up, operate and control injection moulding machines and related equipment.
- Monitor and adjust temperature, pressure, cycle times and other process settings to optimise process stability and output.
- Identify process variations and troubleshoot equipment or production issues to minimise downtime.
- Conduct equipment inspections and carry out routine and preventive maintenance.
- Inspect moulded components for defects, dimensional accuracy and surface quality.
- Use calipers, micrometers and gauges to verify product conformity.
- Document quality issues, support corrective actions and maintain accurate production and quality records.
- Ensure compliance with ISO standards, documented procedures and company quality requirements.
- Apply practical knowledge of moulding processes and materials when investigating production or quality issues.
- Read and interpret technical drawings and specifications.
- Support robotic automation and auxiliary manufacturing equipment where required.
- Contribute to process stability, equipment performance, product quality and continuous improvement.

- Work with production, quality, maintenance and other cross-functional teams.
- Follow all health and safety procedures and safely handle production materials and equipment.

Required Qualifications & Experience

- 2+ years of technical experience supporting injection moulding machinery or similar manufacturing equipment, including machine set-up, process adjustment, troubleshooting and/or maintenance.
- Strong practical understanding of injection moulding processes, materials and quality standards.
- Ability to read and interpret technical drawings and specifications.
- Strong mechanical aptitude and practical troubleshooting capability.
- Experience using calipers, micrometers and gauges.
- Strong attention to detail, problem-solving and communication skills.
- Ability to work independently and as part of a team.
- Flexibility to work shifts, including nights and weekends.

Preferred

- Technical certification in plastics technology, manufacturing or a related industrial discipline.
- Experience with Engel, Arburg, Sumitomo Demag or Battenfeld equipment.
- Experience with robotic automation and auxiliary equipment.
- Exposure to Lean Manufacturing and/or Six Sigma.
