Electrician

Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

Job Description

GRIAN52 is seeking an experienced and motivated Electrician to join our renewable energy installation team.

The successful candidate will work on residential and commercial renewable-energy projects, including solar PV systems, hybrid inverters, battery energy storage systems, EV chargers and associated electrical installations.

The position involves installation, commissioning, fault-finding, maintenance and customer handover of renewable-energy systems throughout Ireland.

Key Responsibilities

- * Install residential and commercial solar PV systems.
- * Carry out AC and DC electrical installation associated with PV systems.
- * Install and commission hybrid and grid-connected inverters.
- * Install and configure battery energy storage systems.
- * Install EV charging equipment.
- * Install AC/DC isolators, protection devices, distribution equipment and associated cabling.
- * Test, inspect and commission completed installations.
- * Diagnose and repair faults on existing solar PV, inverter and battery systems.
- * Configure inverter, battery and monitoring platforms.
- * Verify system performance following commissioning.
- * Complete electrical testing and installation documentation.
- * Assist with upgrades and modifications to existing electrical installations.
- * Read and work from electrical schematics, PV designs and site drawings.
- * Ensure installations comply with current Irish electrical regulations, Safe Electric requirements, ESB Networks requirements and applicable standards.

* Maintain high standards of workmanship, housekeeping and site safety.

* Communicate professionally with customers during installations and service visits.
