Process Technician

Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

Job Description

Limerick | Permanent | Day & Night Shifts

We are seeking a motivated Process Technician to join a high-performing manufacturing team producing ophthalmic lenses in a highly automated environment. This role offers the opportunity to support production equipment, drive continuous improvement, and contribute to quality, safety, and operational excellence. Selected candidates may also provide calibration support during night and weekend shifts.

Key Responsibilities

Operate, monitor, and maintain automated production lines.

Troubleshoot equipment and process issues to minimise downtime.

Perform fault-finding, preventative maintenance, and corrective actions.

Support continuous improvement initiatives focused on quality, yield, and efficiency.

Assist with process optimisation and quality improvement projects.

Maintain high housekeeping, safety, environmental, and quality standards.

Collaborate with engineering, quality, and manufacturing teams to achieve production goals.

Calibration Support (Selected Technicians)

Provide calibration support during nights and weekends.

Perform calibration activities in line with approved procedures.

Record and report calibration deviations or non-conformances.

Maintain calibration records, databases, and instrument history files.

Support audits and drive the closure of calibration-related NCRs.

Ensure calibration equipment and standards are available and maintained.

Qualifications

Essential:

Level 6 or Level 7 qualification in:

Mechanical Engineering

Electrical Engineering

Electronic Engineering

Moulding Technology

Or a related technical discipline

Experience & Skills

Ideally, you will have 4-5 years' experience in some of the following:

Pneumatics

PLCs and automation

Equipment setup and changeovers

Pick-and-place systems

High-volume manufacturing

Packaging and print equipment

Mechanical maintenance

Injection moulding

Instrument calibration

Advantageous:

Electromechanical qualification

Time-served apprenticeship

Experience in a regulated manufacturing environment

Why Join Us?

Join an innovative manufacturing organisation where you'll develop your technical expertise, contribute to continuous improvement projects, and build a rewarding long-term career.

Benefits

Competitive salary plus shift allowance

Permanent, full-time position

Healthcare cover

Pension scheme

On-site gym

Subsidised canteen
