Automotive Technician

Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

Job Description

About Esmark Finch Vehicle Engineering

Esmark Finch Ltd is a leading specialist vehicle conversion company. We design, engineer and deliver bespoke vehicle solutions for our clients, combining technical precision with exceptional craftsmanship. Our customers trust us because we never compromise on quality, and that starts with our people.

Why this is different

Most technician roles are about servicing, warranty work and turning cars around for the next customer. Here you take a new vehicle and turn it into an ambulance, a response car or a specialist unit that goes straight into frontline service. It's precision electrical and mechanical work, far cleaner than a typical workshop, and people's safety depends on it.

As an Automotive Technician

Carry out installation of electrical and mechanical systems (lighting, communications, control systems).

Work as part of a team to complete full vehicle conversions to the highest standards.

Diagnose, test, and resolve technical issues using modern tools and processes.

Follow structured build documentation and quality procedures.

What We're Looking For

Experience: Minimum 2 years' relevant experience in the automotive industry.

Skills: Strong understanding of automotive systems and diagnostic tools.

Mindset: Passion for vehicle modification, technology, or motorsport.

Language: Good communication skills in English.

Licence: Full driving licence (preferred).
