Job Description

Job title: Quality Control Technician

Employer's name: T & T Precision Ltd.

Location: B1. National Engineering Campus, Waterfall Road, Curraheen, Co. Cork - T12 PW52

Annual Salary: €36,605 for 39 hours a week;

Weekly hours: 39 hours per week

Key Responsibilities

- Perform quality inspections of machined components and finished products to ensure compliance with customer specifications, engineering drawings, and internal quality standards.
- Conduct dimensional, visual, and process verification checks, accurately recording inspection results and maintaining quality records.
- Identify, investigate, and report quality issues, non-conformances, and product defects, supporting corrective and preventive actions.
- Review quality documentation, inspection reports, certificates, and production records to ensure accuracy and compliance with company procedures.
- Support root cause analysis activities and collaborate with production and engineering teams to improve quality performance and manufacturing processes.
- Monitor adherence to quality control procedures and contribute to continuous improvement initiatives aimed at maintaining product consistency and customer satisfaction.
- Assist in internal audits, process validations, and quality assurance activities, ensuring compliance with relevant quality management systems and customer requirements.
- Maintain accurate documentation and ensure traceability of inspection findings, quality records, and corrective actions.

Requirements

- Qualification in Quality Assurance, Engineering, Manufacturing, Technology, Science, or a related discipline, or equivalent practical experience.

- Experience in quality assurance, quality control, testing, inspection, validation, compliance monitoring, or process improvement activities.
- Ability to identify defects, investigate quality issues, analyse information, and prepare accurate documentation and reports.
- Strong attention to detail and commitment to maintaining quality standards and procedural compliance.
- Proficiency in Microsoft Office applications and quality-related documentation systems.
- Good communication and teamwork skills, with the ability to work collaboratively across production, engineering, and quality functions.
- Understanding of quality management principles, continuous improvement processes, and quality control procedures.

- **Sector:** manufacturing

Career Level
