Air Conditioning Engineer

Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

Job Description

PCRJ Limited is seeking an experienced and motivated Air Conditioning Engineer to join the team. The successful candidate will be responsible for the installation, servicing, maintenance, fault-finding and commissioning of air conditioning and HVAC systems across commercial and industrial projects.

This role would suit a technically skilled engineer who takes pride in delivering high-quality workmanship, follows health and safety requirements and is comfortable working independently as well as part of a wider project team.

Key Responsibilities

- Install, service, maintain and repair air conditioning and HVAC systems.
- Carry out planned preventative maintenance and reactive maintenance.
- Diagnose and resolve mechanical and electrical faults on HVAC and air conditioning equipment.
- Install and commission split, multi-split and VRF/VRV air conditioning systems.
- Carry out refrigerant recovery, charging and leak detection in accordance with applicable regulations.
- Read and interpret technical drawings, schematics and equipment specifications.
- Conduct system testing, commissioning and performance checks.
- Identify faults and recommend appropriate corrective actions.
- Complete service reports, maintenance records and relevant documentation.
- Liaise professionally with clients, site managers, contractors and other trades.
- Ensure all work is completed to the required quality, safety and environmental standards.
- Maintain tools, equipment and company vehicles in good working condition.
- Follow site-specific health and safety procedures and risk assessments.
- Work collaboratively with mechanical, electrical and other construction teams where required.

Requirements:

Relevant qualification in Air Conditioning, Refrigeration, HVAC, Mechanical Engineering or a related discipline.

Proven experience working as an Air Conditioning/HVAC Engineer or Technician.

Strong practical knowledge of air conditioning and refrigeration systems.

Experience with installation, servicing, maintenance and fault diagnosis.

Knowledge of VRF/VRV, split systems and commercial HVAC equipment.

Ability to read technical drawings and electrical/mechanical schematics.

Good understanding of health and safety requirements when working on construction and commercial sites.

Ability to work independently and manage assigned tasks effectively.

Strong problem-solving and troubleshooting skills.

Good communication and interpersonal skills.
