Job Description

Our client, Gutyiera Limited, based in Donabate, Co. Dublin, is currently seeking a Geotechnical Engineer for immediate start at their facility in Turvey Lane, Donabate, Co. Dublin, K36 P589.

Qualifications & Requirements:

- Bachelor's Degree in Geotechnical Engineering, Civil Engineering, or a related field
- Proven experience in soil stabilisation techniques and applications
- Strong knowledge of ground improvement methods and materials
- Ability to analyse geotechnical data and prepare detailed reports
- Proficiency in geotechnical software and tools
- Excellent communication and project management skills
- Minimum 2 years of experience in a similar role

General Duties / Responsibilities / Experience:

- To apply geological knowledge for the assessment of sites, soils, slope stability, sediments and other observable characteristics in the earth
- To integrate the relevant information into the planning and development of projects in those area
- To assess and answer questions regarding the geological characteristics of soils by performing research and experiments of the selected sites
- To conduct and lead soil stabilisation projects in the construction of roads, platforms and residential sites
- To conduct geotechnical investigations and assessments
- To design and implement soil stabilisation solutions (lime/cement treatment, geosynthetics)
- To analyse and interpret soil data, providing recommendations for ground improvement
- To ensure compliance with environmental and safety regulations.
- To liaise with clients, contractors, and suppliers to ensure project objectives are met
- Essential knowledge includes civil engineering, engineering principles and engineering processes
- Further essential knowledge includes environmental legislation, geographic information systems

and technical drawings

- Applicants must have knowledge of geological time scales, geology, mining, and construction & civil engineering machinery
- Essential skills include adjustment of engineering designs, advising on building matters, and approving engineering designs
- Further essential skills include assessment of environmental impact, compliance with safety legislation, and execution of feasibility studies
- Candidates must be competent to perform sample testing, perform scientific research on sites, and use technical drawing software
- Candidates must have experience in projects involving soil stabilisation, ground improvement and innovative geotechnical solutions
- Experience in soil stabilisation in the construction of roads, platforms and residential sites is required
- Minimum 2 years of experience in a similar role is required

Annual Remuneration: €45,000.00; Pay rate €22.19 per hour

Work Location: Gutyiera Limited, Unit 12 Shannon Valley Centre, Turvey Lane, Donabate, Co. Dublin, K36 P589

Number of hours work each week: 39
