Construction - Energy Engineer - Loughrea, Co. Galway

Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

Job Description

Main Duties and Responsibilities:

- Collect, validate, analyse and report energy and fuel data across offices, sites, accommodation, vehicles, plant and other assets, ensuring data is accurate, complete and supported by appropriate evidence.
- Coordinate energy-related compliance, audits and reporting requirements across relevant countries.
- Support to the Fleet Manager for Group Fleet / Transport sector in its entirety, including fleet management, commercial planning and budgeting, fleet asset maintenance and reporting.
- Drive the organisation's energy and fuel transition, identifying opportunities and working with relevant teams to develop and deliver initiatives that improve energy efficiency and transition towards renewable energy, alternative fuels and electrification.
- Develop energy and fuel-related proposals and business cases, assessing costs, ROI, operational requirements, risks, energy performance and environmental impact.
- Manage relevant energy and fuel procurement activities and develop relationships with utilities, energy and fuel suppliers, technology providers and other external stakeholders.
- Ensure value for money on all the Groups energy and fuel purchases.
- Lead internal engagement and communications relating to energy and fuel.

- Work with Fleet, Sustainability, Finance, Operations, Project Delivery, Procurement, and other teams to support implementation, adoption and delivery relating to energy and fuel initiatives.
- Support client engagements relating to energy and fuel solutions for projects and sites.
- Keep up to date with emerging technologies, market developments, opportunities and compliance obligations related to fuel and energy.

Knowledge, Skills, and Experience:

- Relevant degree or experience in Energy, Energy Engineering, Mechanical/Electrical Engineering, Environmental Engineering, Data Analytics or a related technical discipline.
- Strong numerical, analytical and Excel skills, with confidence working with large datasets.
- Strong understanding of energy, fuels and energy efficiency. Energy or fuel industry experience would be highly advantageous.
- Ability to analyse data and develop practical, commercially sound recommendations.
- Highly organised, proactive and self-motivated, with the ability to manage multiple priorities and drive initiatives through to completion.
- Strong communication and stakeholder management skills, with the ability to work across technical, operational and commercial teams.
- Knowledge of renewable energy, alternative fuels, electrification, and energy procurement.

- **Sector:** construction
