Construction - Junior MEICA Project Engineer - Co. Limerick

Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

Job Description

Main Duties and Responsibilities:

The main duties and responsibilities of the Junior MEICA Project Engineer are outlined as follows:

- Work as part of a team in the delivery of one or more projects at any one time, embracing the ethos of a "one team" culture.
- Ensure Health, Safety, Environmental & Sustainability standards, policies and procedures are always adhered to on-site.
- Administration onsite of Health, Safety and Environmental procedures onsite.
- Prepare detailed Method Statements and Risk Assessments prior to work activities commencing.
- Engage with supplier and sub-contract chain to obtain technical proposals and pricing for their scope of supply.
- Manage delivery of materials in-line with works programme and progress on-site.
- Co-ordinate sub-contractors and direct staff to ensure project delivery in-line with works programme.
- Conduct daily inspections on equipment and complete daily risks assessments.
- In conjunction with the Project Manager and Project Engineer monitor works on-site to ensure

conformance with design and Employer's Requirements.

- Monitor progress onsite to ensure delivery in line with works programme.
- Prepare and supervise completion of on-site test documentation such as site acceptance tests (SAT), inspection and test records (ITRs), pipe pressure testing, hydrostatic tank testing and commissioning of the works.
- Preparation and submission of project handover files including O&M Manuals, Safety Files and As Constructed Drawings.
- Assist the Commissioning Engineer onsite during the commissioning phase
- Working with Process Engineers on process optimisation, including sampling and testing water quality
- Keep apprised of the latest standards and technology through continuous professional development (CPD).
- Show an eagerness to learn and progress in your own career. Glan Agua has a proven track record of developing graduates from graduation through to becoming directors within the organisation.
- Other duties as required from time to time.

Knowledge, Skills and Experience:

The main knowledge, skills and experience required of the Junior MECIA Project Engineer are outlined as follows:

- Minimum of a Level 7 Honours Degree in Civil, Mechanical, Electrical, Mechatronics, Chemical or Environmental Engineering.
- An interest in developing a career within an industry-leading organisation.
- Ability to work as part of a team in project delivery and provide input at team meetings.
- Ability to engage with suppliers and sub-contractors at procurement stage and in delivery of their scope of supply during contract delivery.
- Ability to use own initiative, problem solve and adjust as issues arise during project delivery.

- Good working knowledge of MS packages such as Word, Excel and Powerpoint.
