Full-Stack Web & Software Developer

Application Details

In order to work in Ireland a non-EEA National, unless they are exempted, must hold a valid employment permit. Please review the [Eligibility and requirements for an employment permit](#) if you are unsure of your eligibility to apply for this vacancy.

Job Description

Key Responsibilities:

- Design, build, and maintain web applications and custom digital tools using modern technology stacks.
- Build and maintain automated API integrations connecting web forms, CRM platforms, call/telephony management systems, and communication channels.
- Develop lead acquisition, routing, and data capture pipelines for real-time tracking and dispatching.
- Implement data security measures, server performance optimization, and GDPR-compliant processing.
- Create analytics dashboards to monitor Website audience, lead funnel metrics, and system performance.
- Perform continuous maintenance, database administration, testing, and system upgrades.

Minimum Qualifications & Requirements:

- A relevant diploma/qualification in ICT, Web Development, or equivalent practical professional experience (minimum 2+ years) in full-stack web software development.
- Demonstrated experience with RESTful APIs, webhooks, and CRM or communication system integrations.
- Technical proficiency in frontend and backend web development technologies (HTML5, CSS3, JavaScript/TypeScript, PHP/Python/Node.js or equivalent framework).
- Hands-on experience with database administration (e.g. MySQL, PostgreSQL, or MongoDB).
- Strong technical problem-solving capabilities and fluency in written and spoken English.

- **Sector:** information and communication
