Job Description

Nutribio works closely with its customers to produce quality animal nutrition products that facilitate customer's success in target markets. Nutribio customizes the production process for each customer matching experience with innovation to meet each target. To find out more, look at our website on [www. Nutribio.ie](http://www.Nutribio.ie)

Taking sole responsibility for the running and maintaining of the provender, molassed and premix weighing and blending plants. This includes following the production schedule, ensuring all materials are weighed accurately in the correct order. Setting up the plant to ensure the materials are conveyed to the mixers. Setting up the plant sequence to ensure that the mixed products are conveyed to either bulk, mini bulk or packing bins as per the production schedule. Carrying out preventative and break down maintenance in line with the "Fix" software plan.

- Co-ordinating the production plan in conjunction with the Production Supervisor/Planner.
- Ensuring the recipes on each of the panels are correct from each of the printed BOM'S.
- Setting up the correct sequences for each of the plants as per the production plan. ,
- Monitoring all machine components, belts, bearings chains and carrying out any preventative maintenance required to ensure the plant can continue running safely.
- Report any issues immediately to the production supervisor and or maintenance department.
- Must notify the the production supervisor if there is a problem with the quality of the product (a lot can be detected visually).
- Carry out the work in a manner that does not put himself or other employee exposed to a safety risk.
- Hand weighting and tipping raw materials as per the bill of materials.
- Following standard operating procedures as laid out in the GMP + and UFAS feed assurance scheme.
- Liaising with the Loader driver to ensure that raw materials bins are kept topped to ensure production can continue uninterrupted.

- Taking off mini bulk, labeling, and sampling same using the FLT.
- Completing all documentation, including quality sheets, production plan, production records, taking and recording samples.
- Recording downtime including reasons for downtime and problems
- Must report any faults e.g. that cannot be fixed to the production supervisor and or maintenance department.
- Completing the daily, weekly and monthly house-keeping plan as outlined in the GMP + and UFAS plans.
- Maintaining work area as per the 5S cleaning standard.
- The production technician is responsible for keeping the panel area's clean and tidy and all spillages in this area must be removed immediately as they occur.

- **Sector:** agriculture, forestry and fishing
